

Caretaker Employed For Cemeteries; Advertise For Dentist; May Take Precaution Against Smallpox Outbreak

Henceforth Charge To Be Made For Cemetery Plots; Town's Sanitary Condition Not Satisfactory At Present Time.

Regular meeting of the council was held on Wednesday evening. Present Mayor Aboussaffy, Councilors Cox, Dutil, Jenkins, Lowe, Ramsay and Wilson.

J. Allan Jr. was present on behalf of the proposed Coleman Flying Club, to urge that council secure a license for the local flying field. License could be secured from the Dept. of Transport, Ottawa, at a cost of \$10. Should council take the license it would be responsible for the maintenance of the field. Mr. Allan stated that maintenance costs would be negligible as the field was in good shape at the present time and that Mr. Bouthiller was looking after the field.

Council revealed that it had correspondence dealing with the air field and that it would follow up that correspondence and inform Mr. Allan of its progress.

The Medical Health Officer's report was read. It revealed that in March a number of cases of gripe, 125 cases of measles, scarlet fever and 3 cases of V.D. The general sanitary condition of the town was not satisfactory at the present time but improvement was expected in the immediate future.

Following the reading of the MHO's report the outbreak of smallpox at the west coast was discussed. It was noted that both Fernie and Michel-Natal had taken precautionary measures to stave off an outbreak of the disease in their respective towns. It was decided that the Health committee interview the local doctors to see what measures could be taken to make the town more sanitary and to discuss protective measures against the outbreak of smallpox in Coleman since this town is only a 24 hours run from Seattle, the scene of the outbreak, by bus and only three hours by plane.

Dr. Baden Powell, of the Dental

Association, revealed in correspondence that he had mentioned Coleman to several dentists seeking locations, but to date all had located in other towns. However, he would place Coleman in front of other dentists who might be looking for locations.

The up-shot of this letter was the decision by council to place advertisements in Calgary and Edmonton papers seeking a dentist for Coleman. The fact that a \$2,000 school contract is open will be included in the advertisement.

Mr. H. Culham, undertaker, asked council's permission to operate a morgue and funeral parlors in Coleman in order that they might be approved by Edmonton and also by the Undertakers' Association. It was revealed during the discussion that Mr. Culham planned on modernizing his property here.

The tenders on the old fire truck were not dealt with due to the pressure of other business.

The Business Tax by-law was given third reading. It was revealed that it is possible that better than \$1,000 will be placed in the town coffers as a result of the new taxing system.

The town and school mill rate for 1946 was struck at 45 mills. This is a decrease of 6 mills over 1945.

A week ago the mayor and several councillors inspected the local cemeteries and on Wednesday evening their report was tabled. It revealed that a new road would be built to the cemeteries. A caretaker was to be engaged at \$25 per month for a twelve month period. Plots from now on were to be charged at \$5 per plot. Money from this source was to be earmarked for cemetery improvements. A new system of grave digging is to be employed which will allow some space between plots.

NEZ PERCE CREEK RUNNING AGAIN

It was sweet music to the ears on Tuesday morning when workers passing by Nez Perce creek heard the musical splashing of water on Nez Perce creek's bed which has been dry for many months. Coupled the warm sunny spring morning the musical tinkle of the creek gave one a kind of comfortable feeling that spring was actually here and the threat of frost, ice and snow was at long last behind us.

Wm. Fraser, jr. Promoted To Mine Mgr. At International

Succeeds To Position Vacated By Jim Kellock; Started on Big Job Monday.

William "Bill" Fraser took another forward step in his brief but spectacular mining career when he accepted the position of mine manager at International Coal Coke Co. Ltd., one of the largest mines in Alberta and employing a crew of approximately 500 men. He took over his new position on Monday morning last succeeding Jim Kellock.

Bill is a Coleman product, being educated at the local schools. He started studying mining and secured his third class papers in 1940. In 1943 he successfully wrote his examinations for his second class papers and in July, 1945, secured his first class papers.

Bill is the first Coleman boy to start work as a raw recruit in the mine following his graduation from high school and work his way from a common laborer, miner, fireboss pit boss and then up to mine manager.

As a miner he worked with his father who imparted to him years of mining experience. Long hours of study brought him up the mining ladder of success. He has been encouraged in his mining studies both by the International Co. and also by Harry Gardner, now mine manager at West Canadian Collieries, Blairmore, who helped Bill with his studies when studying first for his second class papers and then again for his first class.

The International Company is particularly pleased with Mr. Fraser's success and is quietly confident in his ability. His promotion to this particular post gives further emphasis to the company's sincere effort to encourage its young employees to study and better their position in regards to mining. Those young men who have the ability and aggressiveness to strive towards securing third, second or first class papers are given every encouragement and aid when necessary.

FUNERAL OF MRS. LEES HELD ON FRIDAY

The funeral of Mrs. Elizabeth Lees was held on Friday afternoon at 2:30 o'clock. Services were held in St. Paul's United church with Rev. J. McKelvey conducting. Hymns sung included "Jesus, Lover of My Soul," "Rock of Ages" and "Nearer My God to Thee." Psalm 91, a favorite of deceased, was read.

Funeralbearers included Wm. Antle, Tom Flynn, George Morgan, Horace Allen, Neil McKinnon and Robert Oakes.

Interment was made in Coleman Union cemetery.

Fred Lees, of Vancouver, was present for the funeral and remained here for a few days, leaving for his home on Wednesday morning. Also in attendance were Mr. and Mrs. James Little, of Fernie, Mr. Little being a niece of deceased, and Mr. and Mrs. Robert Oakes, and Mr. and Mrs. Jack Oakes, of Blairmore.

Funeral Of Oswald Castellano Held On Sunday

Came Here In 1923 Direct From Italy; Had Been In Ill Health For Two Years.

The death occurred in the local hospital at 6 o'clock last Thursday morning of Oswald Castellano, 45, after an illness of two years and which had resulted in him travelling to Rochester and Calgary in an unsuccessful effort to regain his health. He last entered the local hospital in Jan. 3 of this year.

Born at Fubiano, in the province of Udine, Italy, he came to Canada when a young man, settling at Coleman. For two years he worked with the CPR on the Crows Nest division. In 1925 he secured employment with International company as a tangle worker.

In 1927 he married Miss Antonette Macchi who had come to reside in Coleman after several years residence in Hillcrest. They resided in Coleman and built a beautiful home on the flat.

In September 1944 ill health forced him to retire from active employment. He spent the bulk of his time working around his house and his present well-kept condition reflects his handiwork. He was also a member of the Italian lodge.

Surviving are his wife, two daughters, Ida and Loretta and one son, Eno. A brother resides here, S. Castellano, and in Italy his mother, two sisters and a brother survive.

The funeral was held from the Holy Ghost church on Sunday afternoon with Rev. Father L. Sullivan conducting the services. In attendance were many friends and acquaintances as well as both ladies and men's Italian Societies.

Funeralbearers included A. Toppino, S. DeMartin, J. Rinaldi, N. Orlando, L. Salvador and F. DeCecco.

Interment was in Coleman Catholic cemetery.

CARD OF THANKS

We wish to express our sincere thanks to all those who helped during our sad bereavement, to those who sent flowers, mass cards, cards of sympathy and loaned cars. We especially wish to thank those who helped us during Mr. Castellano's lengthy illness, their aid is deeply appreciated.

Mr. and Mrs. Douglas Ramsay, of Vancouver, were the week-end guests of Mr. and Mrs. John Holyk.

Plan On Calling Meeting Of Community To Discuss Skating Arena Plans

Annual Meeting of Sports Association Held Sunday Evening; Plan on Staging A Rodeo Here This Summer.

Coleman Community Sports Association held its annual meeting on Sunday evening with a fair attendance present.

President John McNeil gave his report. He of improvements to the sports park last summer and the aid given the tennis club which is now under the wing of the association. He dealt at some length with the skating arena. It had been planned to have had John S. D'Appolonia and Herbert Hewett inspect the building and give a report as to its condition. Due to pressure of other business, Mr. D'Appolonia had been unable to make the inspection. The meeting then went on record to employ the services of Mr. D'Appolonia to make an immediate inspection and make his report to the committee as soon as possible.

A motion was placed of the books that the Sports Association committee secure all necessary data pertaining to the rink, cost of improvements to the present rink. Should its condition be such that it warranted being dismantled in the interests of public safety the committee were then authorized to secure facts and figures on the design and cost of a new arena. When this information is available a meeting of the entire community is to be called.

Mr. Spillers revealed that a \$100 appropriation had been made, or the purchase of summer sports equipment. \$80 of this amount had been spent on balls, bats, gloves, etc. He also dealt with the skating arena and deplored the lack of proper facilities in the building. He scored the lack of proper supervision to the building and the lack of lavatories. Lack of proper supervision had resulted in much vandalism and he urged that such vandals be prosecuted in a determined effort to stop further destruction to community property.

Funeral Of Mrs. John Lilya Held Last Week

The funeral of Mrs. John Lilya was held on Wednesday, April 10, from the Family Residence in East Coleman with Rev. J. McKelvey, conducting.

Funeralbearers included Vaine Ross, John North, Matt Jarvi, John Suni, Jack Soreh and Axel Taitinen. Interment was made in Coleman Union cemetery.

CARD OF THANKS

We wish to express our deep thanks to all those who aided during our bereavement, to those who sent flowers, cards of sympathy and to those who loaned cars. We also wish to express thanks to the local doctors and to Dr. Epstein, of Bellevue.

Mr. John Lilya and family.

FLORAL TRIBUTES: The Family; Mr. and Mrs. Emile North; Ann and Louise Vasek; Mr. and Mrs. Matt Jarvi; Mr. and Mrs. Joe Mission, Blairmore; John Suni; Sullivan Family; Mr. and Mrs. W. Holstein; Mr. and Mrs. Walter North and Walter Jr.; Mrs. Elizabeth Lonsbury; Mr. and Mrs. Frank

munty property. Several present were interested in bringing a rodeo to town this summer. The committee asked that a letter be sent them and if the situation warranted a special meeting would be held to discuss the matter. The question of building permanent chutes, etc., would have to be given careful consideration.

RECEIPTS
International Co. P.R.Ded. \$4,636.90
McGillivray Co. P.R.Ded. 3,109.00

WORLD HAPPENINGS BRIEFLY TOLD

Reports compiled in Rome state that 22,000,000 persons died during the war, Vatican radio said.

Application has been made for construction of a 1625,000 (\$2,812,500) penicillin factory in Glasgow.

The Phobarch society of Scotland helped train 83 Canadian army pipers during the war, in courses given at Edinburgh Castle.

About 1,000 horses of a possible total of 2,000 expected to be shipped to France during 1946 have left Canada since the start of the year.

Five Welsh poets—Cardiff, Newport, Swansea, Port Talbot and Barry—are seeking the export trade formerly handled by Hamburg, Germany.

German prisoners-of-war will be used as porters, cleaners and other non-technical jobs on British railways to relieve the manpower shortage.

Britain has 2,135,000 telephones in use, with annual call totalling 1,430,000,000. Both telephones and radios are controlled by the postal department in that country.

The Ace of Spades roadhouse in London, requisitioned for the Royal Canadian Navy during the war, is for sale. It has club facilities, a ballroom, restaurant and bar.

Production of steel ingots in February totalled 228,273 net tons compared with 236,607 in January and 235,502 in February, 1945, the Dominion Bureau of Statistics reported.

GARDEN NOTES

Back Savers

While one can garden satisfactorily with a minimum of tools, good results being guaranteed with only a rake, hoe and spade, the job will be made easier and easier with a little more equipment. Three to five pronged cultivators will get the soil between the work of a hoe with the same effort, and a long-handled spade, or fork will save the back in digging. Then again there are special tools for special jobs. Dutch hoes, for instance, will be found faster than the ordinary kind for light weeding, and a long-handled spade will get down the weeds and other weeds out of the lawn without the usual stooping. With all implements, the simplest to the most complicated, big dividends in labor saved, are paid by having cutting edges clean and sharp. An old file will do the trick with hoes and spades.

The Early Ones

First vegetables and flowers that are planted are those which seedlings term "hardy." They stand some frost. Some indeed will stand quite a lot and even a heavy snowfall or a week's return of winter after planting will not hurt them. Both garden and sweet peas are in this category. Both of them must get their first growth while the weather is cool and moist, otherwise they won't develop a sufficient root system to carry them through the hot weather. Grass is in the same class. One can hardly get the new lawn or the annual patching of established lawns done too early though, of course, it is most important that the soil is thoroughly prepared and the ground level before the seed is sown. This last caution naturally applies to new lawns more than patching.

Other early vegetables that will stand some tough weather are spinach, radish and lettuce. Among the flowers are cosmos, marigolds, there are several types of poppies, alysium, any of the perennials, nursery stock, etc.

How To Grow Tender Vegetables

Unchecked growth is the real secret of tender vegetables. Crisp beets, carrots, beans, celery and similar things without stringiness or toughness come from gardens where growth has been hurried along, unchecked by weeds or other neglect. Even if the weather is none too favorable, experienced gardeners can produce this sort of quality.

First they keep the soil well cultivated, both to keep weeds eliminated and also to conserve moisture and encourage quick development in dry weather. They thin those vegetables which need spacing in order that there is proper, even and speedy development. They harvest vegetables when they are at their best, just the right size for eating and before they start to harden and mature.

But that is not all. They keep a fresh supply coming on all through the season by making plantings ten days to two weeks apart right up to the 1st of July. It is the greatest mistake, old gardeners point out, to sow all seed on a single afternoon. Carrots, beans, beets and many other vegetables can be planted successfully over a period of from three weeks to eight weeks in almost every part of Canada. If sown out in this way, the harvest is extended equally at the other end. To extend the season still further one can use early, medium and late varieties. Nowadays a few days of fasting on fresh peas or corn is not enough, one can have that sort of luxury for weeks on end.

BRITISH INVENTION

LONDON.—One of Britain's latest inventions is a Braille reading meter for the rehabilitation of blinded ex-servicemen in certain industries. The instrument will enable former skilled tool and instrument makers to carry on with their normal work.

HANDLES ONE OF FEW SIBERIAN DOG TEAMS IN CANADA.—Siberian dog team is expertly handled by Mrs. W. R. "Bob" Commis of Manitoulin Islands. Dressed in a caribou parka, just as if spring was still around the corner, Mrs. Commis is shown with Bonanza, the leader of the team.

Millions For Relief

Red Cross And United Allied Relief Fund For War-Stricken Populations

Canadian Red Cross in conjunction with the Canadian United Allied Relief Fund, proposes to expend in 1946 some \$5,000,000 of its remaining war relief supplies for war-stricken populations in Europe and China and in addition will allocate large amounts of supplies on hand from its overseas and Canadian warehouses for the same purpose. Commitments against this 1946 allocation are already underway. Officials at the National Headquarters of the Society making this announcement referred to despatches from its overseas representatives stating that suffering in Europe and China due to the war had reached acute proportions, and called for every possible assistance.

Considerable expenditures from available funds and the distribution of large quantities of supplies on hand are also planned for relief in Britain in 1946, it was stated.

Purchases of relief goods, principally clothing and medical supplies, totalling some \$9,000,000 covering commitments on behalf of the Canadian United Allied Relief Fund for the year 1945 have now been completed and the bulk of the goods shipped. In addition to these, approximately \$2,000,000 worth of Red Cross made-up supplies, it was estimated, had also been despatched to European countries and for use in Britain.

Relief goods consigned to Belgium, Czechoslovakia, France, Greece, Holland, Norway, Yugoslavia, China, Denmark, Luxembourg, Poland and Russia in 1945 were packed in over 70,500 cases and carried on 89 steamers.

Committees of each of the above countries collaborated with the Red Cross in the selection and purchase of goods most needed in the individual countries concerned and involved many hundreds of different items.

Among these items were 51,455,000 units of penicillin, 24,275,000 sulfa tablets, 719 long tons of cod liver oil, 1,147,350 garments purchased from the War Assets Corporation, 52 complete Operating Room Units costing \$12,500 each, 131 ambulances, and 297,000 pairs of shoes purchased from the War Assets Corporation and the Department of National Defence.

Postage Stamps

Free India Stamps Were Printed By The Japanese

London philatelists believe they have solved the riddle of who issued a series of nine "Free India" postage stamps.

British troops found the stamps in a building near the banks of the Irrawaddy. They were all delicately colored, produced by a photogravure process, and included the words Azad Hind (Free India).

The stamps varied in value from half an anna to 12 annas and six of them carried a surtax. Seven of the stamps depicted Indian scenes while the other two showed a map of India with a broken chain across it.

There was no evidence that any were ever sold to the public.

Philatelists decided the stamps were issued by Subhas Chandra Bose, Indian left-wing politician and leader until his death in a plane crash of the so-called Indian Army. The stamps were printed in Burma under the auspices of the Japanese who planned to use them after their victory in India, but the Japanese campaign failed and the stamps were never used.

In Rockford, Ill., the tombstone of Criminal Lawyer John Goemmel bore the straightforward inscription: "The Defence Rests." 2668

Not Uncommon

Destructive Tidal Waves Are Often Experienced In The Pacific

Destructive waves such as struck Hawaii and North-Pacific points are commonly called "tidal" waves. Actually they are properly seismic waves, since they have their origin not in tides, but in underwater disturbances of the ocean floor.

Such waves are not uncommon in the Pacific since it is largely ringed with a seismic belt.

The waves are of two types, one being caused by a subsidence of the sea bottom, the other by an upheaval. In the case of the former, the waters recede, then rush back upon shore violently. With the latter, there usually is no warning.

Vessels at sea, even directly over the centre of the disturbance, usually are in little or no danger.

Another possible but hitherto untold manner of developing a tidal wave of limited range is the explosion of an atomic bomb under water.

A-bomb experts at Washington, however, laughingly dubbed as fantastic questions about such an origin for the Pacific waves which caused widespread havoc recently.

Some scientists believe that in the second bomb test at Bikini atoll, where the atom charge will be detonated slightly beneath the surface, a wave of as much as 100 feet may be developed within the 21-mile long, shallow lagoon. They said such a wave would be entirely localized, its force spent against the fringing reefs and islands surrounding the lagoon.

The proposed third test, where the bomb is to be exploded at a depth of several thousand feet, probably will produce little wave action of any sort, experts predict.

Potatoes were not used as food in Europe until 100 years after their discovery in South America.

For Bee Keepers

Should Feed The Package Bees At Once On Arrival

Importers of package bees should be sure to have all the necessary equipment ready to house and feed the bees when they arrive from the Southern States because the shipper supplies only enough food for the bees to carry them to their destination, says C. A. Jamieson, Bee Division, Central Experimental Farm, Ottawa.

The cages on their arrival should be set in a cool, shady place and thin honey or sugar syrup brushed or sprayed on the screening. The bees will soon become quiet and may be transferred to their hives immediately if the weather is dull; or, if warm and bright, postpone the transfer until late afternoon or evening, thus reducing the danger from drifting.

The new colonies should be fed liberally until they are well established and are able to secure enough for their needs from the spring flowers. Where all foundation is used, more food will be required as the bees need sugar for the manufacture of wax.

Established beekeepers will have spare combs containing pollen and these should be used in the package colonies. If any colonies are found to be queenless, unite them without delay to a queenright colony.

A beekeeper entitled to obtain sugar should write to the Provincial Apiarist of his province to secure the special permit well in advance of the time the packages are due to arrive.

SOUNDS STARTLING

DENVER.—When the telephone rings in the chaplain's office at Buckley's Field, the soldier who answers it, says: "Chaplain's office — Saint Peter speaking." He is Pte. Saint L. Peter of Omak, Wash., a chaplain's assistant.

To Feel Right — Eat Right!

T.B. OF BOVINE TYPE ALMOST UNKNOWN IN TORONTO HOSPITAL

A correspondent who signs himself "Doubtful"—who obviously is an opponent of any plan to make compulsory the pasteurization of milk—writes to the Vancouver Province and states that it would be interesting to know if city of Toronto could prove that homogenized milk has prevented and wiped out T.B. in that area.

He said he believes "the milk there has been treated for over 20 years, and in that event were the milk to blame, there should not be one case of this disease in a person born there during the last 20 or more years."

The Health League of Canada, sponsors of a nationwide campaign to obtain compulsory pasteurization of milk, hastens to reply to "Doubtful" in this instance. First, there is no connection whatever between "Homogenized" milk and pasteurized milk, except that both raw milk and pasteurized milk can be homogenized. This is a process which breaks up the particles of fat and protein in milk and prevents the cream from rising to the top—it causes these smaller particles to be distributed evenly throughout the liquid. Homogenization has nothing whatever to do with the prevention of milk-borne diseases, and no authority has ever made that claim.

As for Toronto's record since compulsory pasteurization was introduced in that city in 1915, the Toronto Hospital for Sick Children reports that not one case of bovine T.B. from Toronto has been recorded on the hospital's admitting records in 30 years. The hospital reports further that not one case from elsewhere in Ontario has been admitted during the last three years. Ontario has had a compulsory pasteurization law, which is 98 per cent. effective, since 1938. It is the only Canadian province with such legislation on its statutes.

A Double Record

Liner Queen Elizabeth Ducked For Second Time In Dark

The Queen Elizabeth completed a double record recently when, for the first time in her six years' career, she ducked at Southampton in the dark—a tricky job for so huge a ship. The first "leg" of the record was put up by her master, Captain C. M. Ford, when at the start of the voyage he brought the liner out from New York without assistance because of the tugboat strike in the port. On arrival at Southampton, Captain Ford said the liner behaved perfectly on both occasions.

The sweet potato is an edible member of the morning glory family.

SAVES REGINA SCOTS' FACE—

Dancing teacher Marilyn Whittit is the answer to Scotsmen's prayers of Regina, Sask. All set to celebrate Robbie Burns day last January, Regina Scots couldn't find anyone qualified to dance the Highland Fling. An "importation" filled the bill temporarily, but Marilyn, a Regina citizen, now is taking lessons in Highland dancing. And she'll teach others.

Powerful Rocket

Deadliest Thing Ever Fired From Airplane Says U.S. Colonel

The United States war department removed the veil of secrecy around "Tiny Tim", a powerful rocket which an army spokesman said is "by far the deadliest thing ever fired from an airplane."

Col. Donald B. Diehl, commanding officer at the Dover army air field, said the rocket "can sink almost anything that floats." "It has driven holes all the way through a light cruiser from side to side," he reported. "It goes through a destroyer as if it were a piece of paper."

The new weapon, which can be fired from any present type fighter plane or medium bomber, was described by Col. Diehl as a "huge rocket 11.75 inches in diameter and 12 feet long."

FROZEN APPLE JUICE

Frozen apple juice may become a commercial reality, allowing producers to extend the market period beyond the normal season. Experiments by the food technology division of the University of California have shown that both fresh apple juice and sharp cider retained their natural flavor and color after even six to 12 months in storage.

Paris was the largest city in the world for 1,600 years.

Pass - Lethbridge Coal Fields To Be Ruhr Of Canada...Shackelford First Board Of Trade Meeting Attended By Fifty-One Business And Professional Men

Mayor A. W. Shackelford Delivered Main Address; Mayor Frank Aboussaff Welcomed Visitors On Behalf Of Coleman And Board Of Trade.

An attendance of local business and professional men as well as several councillors and mine officials taxed the banquet room of the Grand Union hotel to capacity last Friday night at the first meeting of the newly organized Coleman Board of Trade. Five prominent Lethbridge Board of Trade members were in attendance, they being B. of T. president Charlie Bryant, executive secretary Roland Beard, His Worship Mayor A. W. Shackelford, Stan Lamb, CPR superintendent, Lethbridge division, and Cleve Hill, president of Lethbridge Junior Chamber of Commerce, President Horace Allen presided.

Mayor Frank Aboussaff, on behalf of the town and the Coleman Board of Trade, extended a welcome to the visitors.

President C. A. Bryant introduced his fellow Board members and in a brief address congratulated Coleman on its Board of Trade and promised close co-operation between his Board and Coleman's on any problems that would be to the welfare of southern Alberta.

The principal speaker was Mayor Shackelford. In a fifteen minute address he stated that:

Lethbridge Board of Trade is older than Lethbridge itself. It was organized in 1880, and that grand old man, Charles Alexander Magrath, now living in retirement in Victoria in his eighties, was the first president. Two years later, Lethbridge obtained its town charter and Mr. Magrath was elected the town's first mayor.

Naturally, with a man like Mr. Magrath as president, the Board started out with a broad outlook. Members knew that Lethbridge would never amount to much unless the country around was developed—the coal mines, the ranch lands, the farm lands, the rivers, served with railways and highways, and stabilized by irrigation of the plains country.

It was nine years after the Lethbridge Board of Trade was formed that the Crow's Nest Pass Railway was built through the Crow and on to serve the mining towns of Fernie. That brought the Board one of its first big fights because the railway company threatened to by-pass Lethbridge and leave it without direct railway connection with the rich coal fields of the Pass.

Lethbridge Board of Trade has always led in development of irrigation. That is not strange because Mr. Magrath was a Dominion Land Surveyor. He conceived the first big irrigation project in Alberta to water lands of the Alberta Railway and Irrigation Company between Magrath and Lethbridge. He built the first dams and ditches around 1900, and the Lethbridge Board of Trade is still behind irrigation, working hard for the St. Mary's dam which will carry irrigation to another 350,000 acres of land in Southern Alberta, providing stability to the big area between Lethbridge and Medicine Hat.

Lethbridge Board of Trade has also had a keen interest in highways. It was one of the prime movers with Boards of Trade of the Pass Towns, Fernie and Cranbrook in launching many years ago the Red Trail Association—now the Southern Trans-Canada Highway Association. Lethbridge people feel that this is one of the most important highways in Southern Alberta and Southern British Columbia. It is the first East-West Highway which any tourist entering Canada from the U.S. in either Alberta or British Columbia will strike, and it is destined to play a big part in the tourist traffic of the future. It should be hard-surfaced from end to end. When the new link from Hope to Princeton is completed around Hope Mountain in Southern B.C. it will cut off 200 miles from the prairies to Vancouver, and it will serve the rich mining, lumbering and fruit lands of Southern interior British Columbia. Lethbridge, with you here in Coleman, has a vital interest in that highway and we should let nothing stand in the way of its completion as a hard-surfaced all-year road.

Lethbridge Board of Trade is looking to the future. Canada needs more people. We cannot ex-

pect to hold the rich resources with which we have been endowed with a mere handful of people. Instead of 12,000,000 population we should have 25,000,000 or even 50,000,000. Southern Alberta and South Eastern British Columbia have some 87 per cent of Canada's great coal deposits. Some day we will be the powerhouse of Canada because coal is power. But we of the Lethbridge Board of Trade are not satisfied that our present coal mining development is the ultimate in our coal industry. Some day we will see great plants processing our coals, taking from them the real wealth which we now waste in the air—the nylons, the dyes and perfumes. We are glad to see that over the Divide at Michel the Crow's Nest Pass Coal Company is making a start in coal processing. One day the Crow's Nest Pass and Lethbridge coal fields will be the Ruhr of Canada, and Boards of Trade should study this possibility and keep forever pounding away at the powers-that-be to spend the money required for research to bring this industrialization about. Lethbridge Board of Trade has noted the decline in Canada's oil production. One day processed coal will provide coloidal fuel which will take the place of the oil we now take from the deep sands.

Gentlemen, these are just a few of the Lethbridge Board of Trade's many activities. I might mention many others—the necessity of a revision of freight rates to make Western industrialization possible—the need for the preservation of the Eastern slope of the Rockies, the source of water for 50,000,000 acres of prairie agricultural land—the need for better educational facilities in Southern Alberta, with an agricultural, mining and mechanical college for the training of our young men and women—the development of aviation routes and a dozen and one other "musts" if this part of the world is to fulfill its destiny.

Mr. Cleve Hill, president of the Junior Chamber of Commerce gave a very good address on the work being accomplished by that body. At the present time they are conducting an educational campaign among hotel and restaurant employees and also with the city police so that should a tourist infringe on the city's traffic law no "red-faced" cop will walk up to them and hawl them out but instead will do his utmost to help them out and direct them to hotels, restaurants and give them road information.

Mr. Stan Lamb told of the heavy coal shipments from the Pass and particularly from Coleman. These shipments meant payrolls in Lethbridge and the city of Lethbridge had every reason to be thankful to Coleman. Coleman, in the past, has had no organization to fully publicize its assets. The CPR had burned Coleman coal for many years and it would continue to haul and burn Coleman coal for many years to come.

Mr. Roland Beard touched on eighteen points in his address "The Mechanics of a Board of Trade." At the conclusion of his address he stressed the fact that the Lethbridge Board of Trade would be willing and anxious at all times to co-operate with Coleman or any other southern Alberta Board of Trade on problems pertaining to the welfare of southern Alberta.

Mr. J. J. McIntyre was called upon and gave a vote of thanks to the Lethbridge delegation for their splendid addresses and their expressions of co-operation with Coleman.

Following the addresses some business was transacted and saw endorsement of the resolution sent by the Pass Rehabilitation Committee to Mr. Tucker, chairman of the Parliamentary Committee on Veteran's Affairs re the acute housing problem in the Pass area.

Regular meetings will be held once a month and a Tuesday was chosen as the days on which meetings will be held.

As the meeting was concluding Mr. C. S. Short added his thanks to the Lethbridge delegation for coming to Coleman to start the local organization on its way.

Heavy Death Toll At Railroad Crossings

Carelessness of motorists, faulty visibility due to "fogging" of windshields and car windows resulting from frosty weather, and failure to heed the time-honored signals, "stop, look and listen," continue to take their heavy toll in death and injuries.

This much is clearly evident from statistics compiled by the Board of Transport Commissioners for Canada, showing that there were 378 accidents at railway crossings in the Dominion during 1945. These accidents resulted in a death toll of 129 persons and a total of 598 persons were injured, some of them seriously, as the result of contesting the right of way with locomotives and trains.

The Board, breaking the accidents down into various compartments in order to determine underlying causes, reports that in 107 cases—nearly a third of the total—it was the automobile which ran into the train.

In most other cases the entry read, "Automobile drove onto crossing in path of train and was struck."

Indicating that impaired visibility has a direct bearing on ratio of crossing accidents—as it has on most other forms of mishap involving motor vehicles—statistics reveal that the months of November and December are most prolific in accidents of this sort. During these months, days are shorter and the cold weather tends to cut down visibility by frosting windshields and windows. The imperative need for widespread use of anti-frosting and de-frosting devices on all types of motor vehicles, including farm trucks, is clearly evident.

Above all, however, seems to be the need for caution at all times. The railways are doing their best to cut down the crossing toll by constant education among their employees and the public, and the Dominion government assists greatly through administration of its level crossing fund. Nothing, however, can save drivers from their own folly.

Q. What do corrugated and trundled under finger nails indicate?

A. Usually a run-down condition.

Tom Grey Says It's a Fact!

And We Can Prove It!

In both India and Egypt rabbits and eggs, as the symbols of fertility and reproduction, were closely identified with the spring festival which corresponds to our Easter. Easter was the festival to welcome the return of spring, the season of new birth. 1. "Nuggets of Knowledge"—Geo. W. Stimpson.

People keep us busy because we were founded on, and cling to, principles of lasting merit.

HARD OF HEARING

Have you ever watched a motion picture that was out of focus? You cannot read it clearly and the faces are blurred. When you become hard of hearing, your ears are out of focus for various pitches that are clearly audible to the normal ear.

For comfort and good hearing, your hearing loss must be interpreted for loss of pitch and brought back into focus. Amplification alone is not only inadequate, it may be definitely harmful both to hearing and the nervous system. Don't be satisfied with anything less than a thorough test and fitting to your particular loss.

The new Acousticon has a degree of flexibility for fitting purposes which sets a new high in hearing aid history.

Seek the skill and service that your priceless hearing demands.

CLAN DONNACHAIDH SOCIETY TO SPONSOR DANCE MAY 23

On Thursday, May 23, the Coleman Clan Donnachaidh Society will sponsor a dance in the Community hall. This is one of a series of entertainments arranged by this society to raise funds for a pipe band. The proceeds will help to buy uniforms as there is sufficient money on hand to pay for the drums which have already been ordered. We trust that everyone will support this effort as it is Coleman band. Ed's

orchestra has been engaged for the occasion and everything has been planned to put you in that holiday spirit. This is the second annual dance. Keep the date open—May 23rd.

INJURED IN BUS ACCIDENT

The little daughter of Mr. and Mrs. Norman Smith, who with her parents, was returning to their Vancouver home after a holiday spent in Coleman with Mrs. Smith's mother, Mrs. Jack Derbyshire, was injured in a bus accident near Penicton. The little girl was taken to hospital and it is not known by Mrs. Derbyshire whether or not she was detained in the hospital or just had her wounds attended to. It appears that no adults were injured. Cause of the accident is said to be due to part of the roadway giving away.

Bill Fraser Voted Most Valuable Player To His Team

Announcement was recently made that Coleman Grands have been officially declared winners of the Crows' Nest Pass intermediate hockey league and as a result will be the initial holders of the Crows' Nest Pass Memorial Shield. Owing to the intermediate playoffs and the subsequent warm weather it was found impossible to complete the league schedule and the playoffs for the shield. However, at the time of the cancellation of the remaining games, Coleman Grands were leading the league with ten wins and no losses and it was felt by the league executive that they were entitled to the league championship.

Another feather in the Coleman team's cap was the announcement that their veteran centre ice player, Bill Fraser, had been selected as the player in the league most valuable to his team. As a result of this honor Mr. Fraser will be the

recipient of an award being made by Leo Shannon, of the Sentinel Motors, Coleman.

The Crows' Nest Pass Memorial Shield was donated to the Crow league last fall for league competition by the Alberta breweries in memory of the boys from the Pass who made the supreme sacrifice in the Second Great War.

DOMINION CONTROL OF PACKING PLANTS TERMINATED

Termination of the control of meat packing plants across Canada through special controllers appointed by the Dominion some time ago, is now announced by Hon. Humphrey Mitchell, Minister of Labor. Removal of the control is effective March 17th.

Controllers and deputy Controllers had been named by the Dominion Government when a work stoppage threatened to halt production in meat processing plants last fall. Plants affected are located at Vancouver, New Westminster, Edmon-

ton, Moose Jaw, Regina, Prince Albert, Winnipeg, St. Boniface, Toronto, Peterborough, Hull and Montreal.

Three different firms were involved—Canada Packers Ltd., Burns and Co. Ltd., and Swift Canadian Co. Ltd.

The original dispute between the managements and the employees was referred to Mr. Justice S. E. Richards, of Winnipeg for investigation and report. The report of Mr. Justice Richards, concurred in both management and the union, has been submitted to the Minister of Labor, and provides the basis for settlement of the dispute.

The employees are members of the United Packinghouse Workers of America.

The Minister expressed appreciation to Mr. Justice Richards, as well as the parties to the dispute, for their co-operation and success in reaching an agreement and avoiding a work stoppage.

Announcement**Traders Finance**

Opens Office In

LETHBRIDGE

EXTENDING all its financing services to the residents of Southern Alberta, TRADERS FINANCE CORPORATION LIMITED has opened a fully-staffed office at 1 McKenzie Electric Building, 706a Third Avenue South, Lethbridge, under the management of Terrence M. Justice, who recently returned from overseas service as a captain in the R.C.A.S.C.

FOUNDED in 1920, when livery stables still outnumbered garages throughout Canada, TRADERS FINANCE CORPORATION has continued to expand its services to automobile dealers and the general public alike.

TODAY TRADERS FINANCE CORPORATION offers both retail and wholesale financing; life insurance included with certain passenger car contracts at no extra cost; regular car, truck, tractor and farm implement coverage; credit and collection service, and, through its subsidiary, TRANS-CANADA CREDIT CORPORATION LIMITED, operates a personal loan business, loaning on the above-mentioned chattels and also such household chattels as furniture and refrigerators.

MR. JUSTICE, who is managing the Lethbridge office of TRADERS FINANCE CORPORATION, has been with the Company in Winnipeg and Calgary for nineteen years, with the exception of his war service, which terminated a few weeks ago.

Mr. and Mrs. Archie Fraser To Leave Coleman Shortly

Came Here Over 30 Years Ago; Plan On Residing Near Victoria.

Mr. and Mrs. Archie Fraser and son, Archie Jr., are making preparations for their departure for the west coast where they will make a home nearby Victoria on Vancouver Island.

It is over 30 years ago since Mr. and Mrs. Fraser came to Coleman, first residing on Second street before building their present home in Graftontown in 1923. Archie worked at International for several years and during the past year was town assessor. He resigned from this job last October.

Their daughter and husband, Mr. and Mrs. Victor Pearson, have 4½ acres of land near Victoria and upon their invitation Mr. and Mrs. Fraser are planning on taking over an acre of land from them on which

to build a new home.

The son, Archie Jr., plans on continuing his music and recently received offers from two Vancouver bands to join their organizations.

They have two homes in Graftontown which are advertised for sale in this issue and they also own some land in the Pincher Creek district which they will endeavor to sell before breaking ties with the Crows Nest Pass.

The Churches

ST. PAUL'S UNITED CHURCH

Sunday, April 21:
11 a.m., Morning worship. Rev. Irwin guest speaker. Special Easter music by the choir.
12:15 noon, Regular session of the Sunday school.

7 p.m., Special evening service with Rev. Larkie as guest speaker. On Friday evening April 19, the Blairmore choir will render their special Easter music in the St. Paul's United church under the auspices of the WMS an offering

will be taken.

Sunday, April 28, will mark the 40th anniversary of our church. On that occasion we will have Rev. Bainbridge of High River, who is president of the Alberta conference as our speaker. Following the morning service a congregational meeting will be held. All members and adherents are cordially invited to be present.

The annual anniversary supper will be held in the club room on Saturday, April 27 from 5 to 6:30 p.m.

The choir will be singing the anthem, "To Him All Power," by Caleb Simper.

"SILENT BILL" BIDDLE GAVE PUBLIC ADDRESS HERE TUESDAY

Silent Bill Biddle was in town on Monday evening and addressed the Lions club on the subject "Crime Does Not Pay."

On Tuesday he addressed a public meeting on the same subject along with a number of slides showing some of the most notorious American gangsters behind bars, or stretched out on a marble slab.

He is speaking throughout the Dominion on behalf of the Prisoners Aid and Welfare Association and this is his farewell tour after fifteen years of travel coast to coast on the Association's behalf.

He attributed the cause of most crime today at the door of the home. Here, he stated, was the source of practically all our juvenile delinquency cases.

Juvenile delinquency was on the increase all over Canada with the exception of Alberta. He paid high tribute to the service clubs and to religion for aiding in bringing back youths to the straight and narrow and keeping them there.

YOUNG CHILD PASSED AWAY ON SUNDAY

Elizabeth Truch, 6-year-old daughter of Mr. and Mrs. Peter Truch, of East Coleman passed away on Sunday. The funeral was held on Wednesday afternoon, Rev. Father Sullivan conducting the service at the family residence, interment being made in Coleman Catholic cemetery.

THEATRE NOTES

"The Lost Weekend," adapted from Charles Jackson's famous best-seller of the same name, is the story of five excruciating days and nights in the life of Don Birnam, a young man who can no longer call his soul his own. Though sensitive, intelligent and irresistibly charming, chronic alcoholism breaks his spirit by slow, tortuous degrees. Director Billy Wilder has made this terrifying journey into horror an unforgettable theatrical experience. Producer Charles Brackett has created a picture that, for its integrity and realism has never been equaled. The photography by John Seitz is also daringly original.

IMPERIAL OIL LIMITED

OVER 2200 TOWNS, VILLAGES AND CITIES IN ALBERTA
DEPEND ON HIGHWAYS
AS THEIR ECONOMIC LIFELINE FOR INDUSTRY AND COMMERCE

Alberta is preparing for invasion... invasion by the friendliest, most travel-minded people in the world... the people of the United States. Holiday-hungry for the most magnificent scenery on earth, they will converge upon this vacation wonderland that is Alberta. They will come by train, by plane, and by bus, but... owning, as they do, 25 million automobiles, more than one-quarter of our tourists will come by motor car.

These motoring tourists are our most profitable tourists! They touch upon a greater number of our communities for gasoline and services, more vacation spots are accessible to them, thus their tourist dollars are spread over a wide area.

INDEED, the motoring tourist is one to get excited about... AND, we can expect them in ever increasing numbers as our highway and tourist facilities are improved and expanded.

OVER SIX MILLION DOLLARS WILL BE EXPENDED ON HIGHWAY BUILDING AND IMPROVEMENTS IN 1946

Alert to the tremendous advantages and scenic attractions we have to make Alberta a tourist mecca, the Provincial Government is spending to the limit of available materials and labor on highway construction and repairs. Every fair minded citizen knows these expenditures are a sound investment, for all-weather highways will pay for themselves. If our highways are below standard, we in Alberta will pay for them, but... if they are good... the people of the United States, the tourists who motor here... will pay for them... GLADLY!

Listen In To...

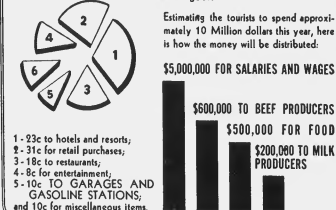

CAPT. J. HARPER-PROWSE

over CFAC CALGARY Sunday—9:45 p. m. and CFRN Edmonton Thursday—8:15 p. m.

47% OF TOURIST DOLLARS GOES FOR SALARIES AND WAGES TO ALBERTA PEOPLE

When a tourist takes a dollar bill out of his pocketbook this is where it goes:

INCREASED TOURIST TRADE WILL INCREASE BUSINESS AND EMPLOYMENT OPPORTUNITIES

As our highway system is expanded and brought up to date, more and more tourists will stream into Alberta. This means we must plan to expand our present facilities. Opportunities will be provided for our Veterans to establish themselves in businesses catering to this lucrative Tourist Industry, and an additional market for everything we make and grow will mean much to Alberta Producers and Industry... opening new opportunities for employment for our citizens.

DO YOUR PART TO BUILD OUR TOURIST INDUSTRY

Like other businesses, tourist trade is highly competitive; and like other business managers, we must be alert and on the job to promote our business by telling the world that WE have the best bargain in scenery... the best product in the world. As each one of us is an important stockholder in the tourist business, we must not miss a single opportunity to boost. Sell Alberta's attractions in your letters and invite friends in the States and Canada to vacation here. AND, when they do arrive, show them every courtesy and make them welcome. REMEMBER your consideration for tourist comfort and enjoyment will pay off in BIG DOLLARS.

THE TOURIST BUSINESS IS EVERYBODY'S BUSINESS... IT'S GOOD BUSINESS

Bob Mitchel Appointed Caretaker Of Coleman Cemeteries; Plots To Cost \$5.00; New Cemetery Roads

Union Cemetery Good For Many
More Years If All Ground Is
Utilized; Council Boosts Its
Appropriation For 1946.

The work started in 1945 to
beautify the local cemeteries will
be maintained with stronger vigor
this year according to councillor
Fred Cox.

Councillor Cox and The Journal
reporter inspected the cemeteries
on Sunday afternoon at which time
various proposed improvements
were pointed out.

The present road with its steep
grade will be eliminated. If not this
year definitely next. Two roads are
being given consideration. One is
to follow along Sixth street,
through Park Terrace, up to the
Harry Boulton residence and then
along the south side of the Catholic
cemetery. The second is to go up to
Sixth street, cut through that small
hill between the Lees and Flynn
residences, follow up the present
valley which lies immediately west
of the present cemetery road and
have the top of the cemetery hill
graded down where it would meet
the valley road at a fairly small
angle so that cars would have no
difficulty in surmounting the grade.

Bob. Mitchel has been employed
part time by the town at \$25 per
month and will be in the town's
employ twelve months of the year.
It is fully realized that Mr. Mitchel
will not be able to accomplish much
during the winter months but he
can keep watch to see that no
fences fall down and that cattle or
horses are kept from trampling the

graves. In the summer he will have
sufficient work to keep him busy.

The town will henceforth charge
for cemetery plots. \$5 will be
charged for a single plot. No longer
will people be able to fence in half
an acre then leave town allowing
the grave to become neglected and
spoiling usable land. The money
from those plots will be embarked
for cemetery beautification.

Inspection of the Union cemetery
revealed that graves lying in the
eastern portion of the cemetery are
neglected. Tombstones reveal dates
of 1906, 1910 and 1912. Old wooden
picket fences are on their last legs
with dry rot while the graves them-
selves need filling in. It was also
surprising to find that families still
reside here who have allowed their
graves, old in years to become
badly neglected. It is Councillor
Cox's intention to pull down the
old picket fences around unmarked
graves. All graves that have caved
in will be refilled and some marker
placed at the head. Persons who
have graves will receive a circular
letter, yet to be drafted, asking
their co-operation in beautifying
the cemetery by taking a greater
interest in relatives' graves.

The Rebekahs took advantage of
the council's offer last year to fix
certain graves and charge labor
and other costs to the organization.
Two graves were shown The Journal
reporter by Councillor Cox
which had been put into shape, the
Rebekahs paying the costs incurred.
Other organizations could follow
the Rebekahs' example to good ad-
vantage.

The practice that had been pre-
valent up to this time of persons
making concrete walls around the
graves and then heaving the debris
at the back of a tree will be stop-
ped immediately. A trough used to
mix concrete has lain in the Union
cemetery all winter with still no
sign of its removal.

Councillor Cox will seek advice
as to whether or not council has the
right to cut down plots which have
been fenced in by parties who
buried a relative, took possibly four
to six plots and then left town at a
later date. The grave is allowed
to become neglected while usable
land is denied other parties.

A new system of grave digging is
to be inaugurated immediately.
Heretofore graves were dug up
against one another and palibearers
were often forced to partially walk
on an adjoining grave in order to
carry a coffin into its proper posi-
tion. Graves will now be dug in
such a manner that a narrow lane
will separate it from adjoining
graves. Another phase of the new
system will be graves dug back to
back allowing a lane to run between
the two rows of graves.

It is proposed to re-survey
present available burial ground and
secure a blue print of the cemetery
as a whole in order to determine
what ground is still available in the
ground which has been used in the
past number of years.

It is proposed to cut down the
trees at the eastern side of the
Union cemetery and put the 'cut to
work if necessary to level some of
the ground. A roadway will be built
to lead up to this part of the
grounds.

The Catholic cemetery has had
two sides of its fences re-newed by
the town. Since this cemetery is
supervised by Holy Ghost church
Councillor Cox plans on interview-

ing Rev. Father Leo Sullivan in
order to determine what improve-
ments might be permitted in this
cemetery.

In order to help the beautification
campaign along council has boosted
its 1946 appropriation up to \$300.

Caretaker Mitchell will commence
his new duties next week. He has
been given the authority to enter
into agreement with any party who
not having the necessary time to
do the work personally, desire a
relative or friend's grave put into
condition at a cost to be determined
between the two parties.

**LIONS HOLD ZONE MEETING
HERE ON MONDAY EVENING**

Zone chairman Lion Ted Hinman,
of Pincher Creek, called a meeting
of all chairmen in the Macleod to
Coleman district to meet here on
Monday evening.

Present from Macleod were H.
T. Halliwell and A. A. Neddown.
Pincher was represented by Jim
Crawford, while stalwarts were
present from Bellevue, led by Al-
wyn Hayson, and Blairmore, led
by John Kerr.

T. B. Questions and Answers

Q. Does the tuberculin skin test
reaction signify active disease?

A. No. Simply infection with tu-
bercle bacilli. But those with ac-
tive disease react to the skin test,
too.

Q. How long have X-rays been
used in the diagnosis of TB?

A. Roentgen discovered the X-ray
in 1895, and shortly after that
X-ray pictures were taken of the
chest. The more general use of
X-ray to diagnose tuberculosis dates
back to around 1916.

Looking Ahead

Fish by the acre... seeing
through a tree... and oil-re-
sistant rubber.

Do you know that fish is the
only main food supply which
man has so far done nothing
to cultivate? He grows his
grains in fields, his fruit in
orchards, his meat in cattle,
swine, sheep.

Now, however, with the
aid of the chemist, our sup-
plies of fish are to be in-
creased. Fertilizer spread on
the surface of fishing waters,
stimulates growth of the
basic fish food (plankton),
so that fish grow and multi-
ply much faster. Fish yields
in farm fish ponds have
jumped 400% with this
treatment.

Can you see through a tree?
Someone might say, "yes, by
X-ray," but that's not the
answer. Chemistry, almost
by magic, can do it by trans-
forming Canadian wood
pulp into liquid cellulose
and then into the material
"Cellophane" with which so
many of your purchases are
protected on their way to
you. "Cellophane" cellulose
film is made by C-I-L at
Shawinigan Falls, Quebec.

Rubber is a grand material
—in the right place! But
some of the uses to which it
has been put were just a bit
too much for its constitu-
tion. When exposed to sun-
light, oil, gasoline or chemi-
cals, natural rubber quickly
deteriorates. And that is
where neoprene synthetic
rubber comes in. It can take
most of the abuse that gets
natural rubber down.

Further information on any of
these products is obtainable by
writing "Looking Ahead",
C-I-L, P.O. Box 10, Montreal,
P.Q.

17-472

No one tipped him off to new synthetic
yarns which would endanger his markets. Now, new ways
and new materials are passing him by.

Nylon:: produced by chemistry from coal, air and
water after ten years' patient research:: is an example. This
wonderful new yarn is already flowing into the manufacture of
glamorous hosiery and will soon be used in foundation
garments, lingerie, and many other textiles, thus creating new
Canadian jobs and new standards of beauty and service.

An Empire Scientific Conference

MANY LESSONS in international co-operation were learned during the war, and some have proved so valuable that they will continue to be applied to advantage in time of peace. It has recently been announced that an Empire Scientific Conference, to be opened by His Majesty the King, will be held in London, Cambridge, and Oxford in June and July of this year. This conference is the result of close co-operation in scientific work which developed during the war. At that time the British Commonwealth Scientific Office was set up for the purpose of co-ordinating research in various parts of the Empire and for providing a central bureau for the interchange of opinion with the United States on matters related to scientific warfare.

Many Urgent Problems Now

It is now believed that the scientific problems of peace are no less urgent than those of war and that it would be advantageous to continue to co-ordinate the work of scientists in all parts of the Empire. The London Times commenting on the forthcoming conference says: "Within the Empire, the scientific problems of peace, both technical and academic, are no less pressing than those of war. There are, for instance, urgent questions of medicine, especially tropical medicine, agriculture, nutritional science and the world fishing industry, while in the more academic field radio communications and cosmic rays present problems which can only be solved by joint efforts in all parts of the globe." It is expected it will be proposed at the conference that the British Commonwealth Scientific Office be succeeded by a similar organization to carry on this important work.

May Be Beneficial To Agriculture

Imperial scientific collaboration has been carried on in the past, on a scale less far reaching than that which developed during the war. One of the most successful examples of the centralization of work for the benefit of the whole Empire has been in respect to agriculture. In 1929 the Council of Imperial Agricultural Bureaux was formed to act as a clearing house for information concerning soil, animal health, forestry and other subjects related to agriculture. It is probable that agriculture will profit to a large extent from the post-war activity of Empire scientists. There is much interest at present in increasing world food supplies, in finding new uses for surplus farm products and in many other problems which would do best benefit from a co-operative effort at their solution such as was applied to scientific problems during the war.

Price Control And Rationing Information

Q.—How many cans of fruit can I purchase with one sugar-preserves coupon?

A.—One sugar-preserves coupon is good for two 20 fluid ounce tins of fruit. If you wish to buy only one can at a time, the grocer may make up the difference with one jar of jam or the proper quantity of any other rationed preserves, such as honey, molasses or maple syrup.

Q.—We are planning on holding a sports day on the 24th of May. Will we be allowed to sell hot dogs and hamburgers on that day?

A.—As this sports day falls on a Friday, you will not be able to sell meat of any kind.

Q.—How many sugar-preserves coupons become valid in April?

A.—Three sugar-preserves coupons can be used in April. Six became valid on April 4 and eight became valid April 18.

Q.—Has the price of butter been increased?

A.—On April 1st the price of creamery butter was increased four cents a pound. Prices for dairy butter remain at the same level as before.

"PIG BELLE TAKES CROWN.—Pretty young winner of the title 'Miss Winnipeg of 1946' is Jean Stirling, happily wearing her crown of office.

BETTER TO SHOUT

Little Mabel, aged six, had a part in the school exercises. She was much pleased and learned her part quickly and said it over loudly and rapidly. It ended with the words "and plead the cause of the poor and needy," which she shouted so loudly that she could hardly be understood.

Just before leaving for the exercises her mother decided to hear her say the part again and asked her to repeat it more slowly. Then she discovered to her horror that Mabel was saying "and feed the cows. They are poor and need it."

A Good Suggestion

Advertising Might Educate People In Principles Of World Co-operation
Use of newspaper and magazine advertising to educate people in the principles and concepts of world co-operation was suggested in an address in Toronto by Albert Bakovsky, Austrian-born founder of the educational research society. "If we can sell soft drinks and tobacco through the medium of advertising," he said, "it is just as plausible that we could sell education and spiritual belief through the same medium."

SMILE AWHILE

Young Woman (in photo studio): "I'd like this enlarged."
Clerk: "Would you like it mounted?"

Young Woman: "Oh, yes—he'll look nice on a horse."

Mrs. Snuggs: "Did I understand you to say Mrs. Perkins is interested in business?"

Mrs. Bitters: "Yes."

"What business is she interested in?"

"Everybody's."

Wife (sorrowfully): "I've just received a letter from poor dear mama. She says she is feeling very seedy."

Hubband (with a grunt): "I suppose that means she's going to plant herself on us."

Roy: "I can't figure out why you always yell 'stop' when I try to kiss you."

Patsy: "And I can't figure out why you always stop."

Mistress: "Maggie, I think I'll take one of the children to church this morning."

Maggie: "Yes, ma'am."

Mistress: "Er—which one do you think would go best with this dress?"

Sergeant: "I suppose you wish I were dead so you could spit on my grave?"

Private: "No, sir! Not me! I hate to stand in line."

The National Geographic relates that when one of the Pan American Clippers was starting for Hawaii, a steward asked a lady passenger if he might put away her coat.

"No, thank you," she said. "I'll be needing it later when I go out on the promenade deck."

Teacher: "Tommy, how many make a few?"

Tommy: "Three or four."

"How many make a dozen?"

"Twelve."

"How many make a million?"

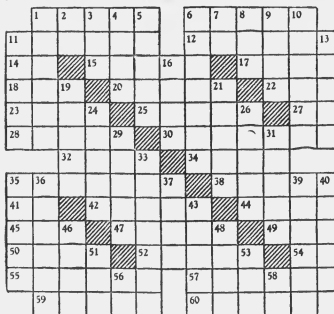

"Very few."

The new Land Girl was doing her best, but she was evidently finding everything on the farm very strange.

Having an incubator explained to her, and being asked if she fully understood it, she put her head on one side and, with a puzzled look, replied:

"Yes, but where does the hen sit?"

Answer To Last Week's Puzzle

DREAM of an Alligator--

"Be Cautious in All Dealings"

THAT'S what the dream books say! And good advice it is, too—if, as is likely, your bad dreams are caused by over-stimulated nerves. And it could be that the cause of your nervousness and excitability is the caffeine in the tea or coffee you drink.

Try Postum! Postum is a delicious, heart-warming, machine drink that you make right in the cup, just by adding boiling water or hot milk. And Postum is free of caffeine or any other drug that might affect heart or nerves or digestion. Costs less than 1¢ a serving. Your whole family should be enjoying Postum regularly!

A Product of General Foods

"But Murgatroyd — you don't have to wait until morning before you eat your crisp delicious Grape-Nuts Flakes."

"I don't! Then pull up a cake of ice and wait till dawn to a couple of bowls of these malty-rich, honey-golden Post Grape-Nuts Flakes!"
"Son, you'll be able to wrestle a walrus on all that grand nourishment in Grape-Nuts Flakes: carbohydrates for energy; proteins for muscle; phosphorus for teeth and bones; iron for the blood; and other food essentials."

Have Never Smiled

But War-Shocked Children In Greece Are Being Taught

In Greece, travellers come upon small groups of children under an olive tree, listening to a teacher. The teacher usually stands, with a broken tree limb in his hand, tracing on the earth.

That broken branch and the teacher's memory are all the "school equipment" those children have. Pencil cost \$2 each. There is no paper, no books. A fourth of the schools are rubbish and most of the rest damaged.

Many of the children have those queer big heads and twisted legs that come from too little to eat for too long. The teacher himself often is so malnourished that he needs help.

But the Greeks are determined the children shall re-learn the ways of peace, so they start these olive-tree schools.

This is part of the baffling job facing the United Nations Relief and Rehabilitation Administration.

U.N.R.R.A. is limited in what it can do for schools, and can spend no money on toys. Yet U.N.R.R.A.'s doctors think play now is so important to war-shocked children that they have a program in Greece called "to teach the children to smile!"

Tens of thousands of children have no reflex action of the cheeks which we know as a "smile!"

FOR POLISH NAVY

An unspecified number of "modern, splendidly-equipped" warships have been delivered by Russia to the Polish navy at Gdynia, under an agreement signed at Moscow, it was officially announced by the Polish government.

DON'T just complain of itching, burning PILES!

do something about it!

If you are troubled with itching piles or rectal soreness, do not delay treatment and run the risk of letting this condition become chronic. Any rectal itching or soreness or painful passage of stool is nature's warning and proper treatment should be secured at once.

For this purpose get a package of Hem-Rid. From any drugstore and use as directed. This formula which is used internally is a small, easy to take tablet, will quickly relieve the itching and soreness and aid in healing the sore tender spots. Hem-Rid is pleasant to use, is highly recommended and it eases the height of folly for any one to risk a painful and chronic pile condition when so fine a remedy may be had at such a small cost. Money back if you are not entirely cured.

NOTE: The sponsor of this notice is an old, reliable firm doing business in Canada for over 20 years. Hem-Rid must help you among and painful pile condition—must be quickly, easily and pleasantly or your own test of this remarkably successful formula costs you nothing. Try it today.

How to Combat RHEUMATIC PAIN

Rheumatic pain often occurs because of excess uric acid, a blood impurity that should be extracted by the kidneys. If kidneys fail and excess uric acid remains, it may cause severe discomfort and pain. Treat rheumatic pain by keeping your kidneys in good condition. Get out your Dadd's Kidney Pills. Dadd's pills purify kidneys get rid of trouble-making poisons and excess acids—help you feel better. See what Dadd's can do for you. 137

GEMS OF THOUGHT

PRaise OF MEN

Praise like gold and diamonds gives its value only to its scarcity.—Samuel Johnson.

Real joy comes not from ease or riches or from the praise of men, but from doing something worth while.—Sir Wilfrid Grenfell.

Some natures are too good to be spoiled by praise, and wherever the vein of thought reaches down into the profound, there is no danger from vanity.—Emerson

Few persons have sufficient wisdom to prefer concealment, which is useful, to praise which deceives them.—Rochefoucauld

We should examine ourselves and learn what is the affection and purpose of the heart, for in this way only can we learn what we honestly are.—Mary Baker Eddy.

Praise too dearly loved, or warmly sought, Enfeebles all internal strength of thought.—Goldsmith

BELOW REQUIREMENTS

In a recent discussion, it was pointed out that 2½ acres of arable land are required today to feed a human being adequately. Total area of land at present under cultivation is said to be four billion acres. As the population of the world is slightly over two billion, this only allows (theoretically) two acres per person. But India averages only one-tenth acres per capita compared with eight acres of improved farm land per capita in Canada.

Vanilla vines are cultivated under trees large enough to afford shade because they cannot stand direct sunlight.

NEW EMPIRE DEFENCE FORCE WILL BE DISCUSSED WHEN LEADERS MEET IN LONDON

LONDON.—Proposals for a new empire defence force supported by all the Dominions will be the most important subject at the forthcoming meeting of commonwealth prime ministers, but informed sources doubt if any mutual decision will be reached.

The meeting, opening April 23, will not be a full-dress imperial conference. Prime Minister Peter Fraser of New Zealand and Prime Minister Smuts of South Africa will not be present at the opening and Prime Minister Mackenzie King of Canada will arrive even later, after the Dominion-provincial conference in Ottawa. Prime Minister Chifley of Australia, and the deputy prime minister of New Zealand will attend the opening.

Prime Minister Attlee, who said recently the main subject of the talks will be "matters pertaining to the Pacific," termed the conference a "personal meeting" to discuss questions of major policy. A detailed agenda will permit the widest possible exchange of views.

"While the conference may well result in reconciling some differences of opinion it is most unlikely that any joint decisions will be taken," one Dominion source said. "Implementation of policy will be a matter for the individual parliament concerned."

The world food situation will have a more prominent place in the discussions than was planned at first in view of the worsening of the position of food stocks.

The Dominions' views on the terms of the Paris peace treaties also will be sought with Mr. King and Field Marshal Smuts, recognized as the elder statesmen of the commonwealth, most attentively heard.

The future of the Ruhr and the Rhineland, including the best methods of keeping them out of wrong German hands to guard against their again becoming a threat to the peace, will be raised and there will be a wide range of other topics such as immigration policies, the refugee problem including the future of Polish troops who do not wish to return to their homeland, intra-empire trade, including the future of the imperial preference, and other matters.

NOT OBSOLETE

Army Still Needed In Warfare
Opinion Of General Simonds

WINNIPEG.—Lt.-Gen. Guy Simonds, home from overseas where he commanded forces in Sicily through to Holland, in an interview scouted the idea that atomic warfare had rendered the army obsolete.

In an inter-continental war, in which two continents bombarded each other with atomic rockets, the winner would be the continent which had sufficient strength in terms of army, to occupy the other continent's bases.

"The post-war world expects a great deal more of Canada than the pre-war world expected," Gen. Simonds said.

Failure of the league of nations must not be repeated. The United Nations must be backed by sufficient strength to enforce decisions.

He advocated a flexible system of universal military training for Canada, closely geared with the economic life of the country.

BRITAIN PREPARED TO FOLLOW OTHER NATIONS IN REGARD TO SAVING OF WHEAT AND FLOUR

LONDON.—Britain will ration bread if the United States agrees to do the same, or will match any measures by the United States to save wheat and flour for people facing starvation and death, the cabinet announced.

A formal cabinet statement after a speech, meeting declared "the needs of the UNRRA countries are undoubtedly great, largely because the supplies which the United States hope to export during the current month fall considerably below expectations."

The cabinet said its decision was taken in response to an appeal by Fiorenzo H. La Guardia, new director general of the UNRRA, for more supplies to prevent famine.

The statement said "His Majesty's government have given very sympathetic consideration to Mr. La Guardia's appeal."

With wheat the most serious shortage, "His Majesty's government have informed the combined food board they are willing to ration bread in the United Kingdom if the United States are prepared to adopt the same policy," the statement declared.

"Short of this, His Majesty's government are prepared to adopt ad-

NEEDING WORKERS

Manufacturing Firms In Birmingham
Face Serious Labor Shortage

BIRMINGHAM, England.—This "city of 1,000 trades" and its industrial surroundings are over the hump of post-war reconstruction.

The main problem to be overcome is the labor shortage, particularly of women workers for light manufacturing. The situation is so serious that some companies are considering moving to other areas where unemployment was heavy between the wars.

Automobiles are coming off the assembly lines with no seats, no mudguards and no door-handles. It is expected, however, that these supply difficulties soon will be overcome.

The government's "full employment" policy, drafted originally by the wartime coalition administration, outlines plans for encouraging manufacturers to move from over-industrialized zones to the so-called "depressed areas" which suffered most from unemployment before the war.

But until it became evident shortages of labor might persist for a long time in such centres as Birmingham and Coventry, Warwickshire, there was little indication that the bigger manufacturers had any inclination to move.

Now a considerable number of industrialists in the midlands have branched out into the "depressed" districts—particularly south Wales where a factory expansion boom has been reported.

LONG CANOE TRIP

Vancouver Prospector Starts For
New York Over Inland Watersways

VANCOUVER.—O. P. Smith, 66-year-old fisherman and prospector is paddling up the Fraser river on the first of a canoe trip from Vancouver to New York over inland watersways.

Mr. Smith left Vancouver's English Bay, April 7th and peddled around Point Grey into the mouth of the Fraser, then continued on up the mighty river.

He plans to follow the disused route of the old fur traders eastward down the Alouette river and other streams and lakes.

He will reach Lake Winnipeg on the Saskatchewan river, then proceed along the Winnipeg river, and eastward to the Great Lakes.

DEMAND REFUSED

Girl Teller In Toronto Bank Not
Intimidated By Bandit

TORONTO.—A girl bank teller's calmness frustrated a robbery of the Royal Bank's downtown branch at Richmond and Yonge streets when she disregarded a threat to kill her and refused to hand over a stack of bills.

Miss Emily Schleifer, the teller, looked up to read a note which a youthful gunman pushed through her cage. It read: "Teller, sound no alarm. I have a gun. Hand it over or I will kill you."

Miss Schleifer calmly handed the note back and said: "I haven't time for that nonsense; besides, I am too busy."

Reporting the decision, the exchange telegraph news agency commented:

"Whatever happens, Britain cannot now be accused either in America or elsewhere of selfishly clinging to higher food standards than the world food situation can justify."

"She shows she is willing to accept any sacrifice that the United States is willing to bear."

In Washington Mr. La Guardia suggested wheat stocks from Britain should be shipped to the continent to halt the immediate threat of famine.

It was learned prior to the cabinet announcement that Britain was not anxious to make stocks available for shipment abroad unless there was a definite guarantee the stocks would be replaced almost immediately.

The Rocky mountains stretch from the hot deserts of New Mexico and Colorado to the Arctic.

IRAN'S U.N. DELEGATE—Ambassador Hussein Ala of Iran got his opportunity to place his country's case before the security council after Russia's delegate, Andrei Gromyko, walked out. He urged speedy discussion of the problem.

MAY BE DELAYED

Early Spring Break-Up Likely To
Hinder Muskox Expedition

EDMONTON.—A hotel room here has been reserved for May 4 by Lt.-Col. P. D. Baird, of Montreal, commander of the Canadian Army's Operation Muskox—a day before the scheduled completion of the 3,000-mile Arctic trek, but it was learned the earliest spring break-up in the history of the Canadian north is complicating the successful completion of the last lap of the exercise.

The snowmobiles of the expedition now are making their way across the ice of Great Bear Lake. Ahead of it lie crossings of three major rivers and a number of uncharted and unmapped smaller streams.

MUST HAVE PROOF

VIENNA.—A French circus impresario, arrived here to claim two elephants and a giraffe, now in the Vienna zoo which he says were seized by the Germans after they occupied Paris. Zoo officials are unwilling to hand over the animals unless the Frenchman supplies further proof of ownership.

IN SHORT SUPPLY

Candy Manufacturers Unable To
Make Many Easter Novelties

OTTAWA.—This will be another tough year for the Easter bunny. Candy manufacturers report this season will be the worst on record with only a small supply of goodies to satisfy Canadian kiddies.

"Although our new sugar quota arrived April 1 and despite a 10 per cent. increase, it came too late to use it for making Easter novelties," said an Ottawa candy merchant.

The 10 per cent. increase in the industrial sugar quota still leaves the over-all supply lower than a year ago and 20 per cent. below the quotas in effect throughout most of 1943 and 1944, the prices heard said.

HONEY PRICE UP

OTTAWA.—An increase of one per cent. a pound in the wholesale ceiling price of honey, effective at once has been announced by the prices board. A maximum adjustment from one to one and a half cents a pound would result in retail prices.

CANADA'S NEW CARDINAL GETS BIG WELCOME—Canadians gave a warm welcome to Cardinal James McGuigan, Canada's first English-speaking cardinal, as he returned to Toronto, Ont., from Rome, Italy. From the time he again set foot on Canadian soil in Halifax, N.S. he was given receptions at various points along the way. Here he is being tendered a formal liturgical welcome to St. Michael's cathedral, Toronto.

BOASTING HERMANN GOERING TALKS WITH HIS LAWYER—Hermann Goering filled a week on the Nuremberg witness stand, boasting of being the main cog in the Nazi wheel. Here he confers with his lawyer, Dr. Otto Stahmer, through opening in the prisoners' wired enclosure, while American M.P. stands guard.

MILITARY STAFF COMMITTEE OF UNITED NATIONS PLANNING TO ORGANIZE ARMED FORCE

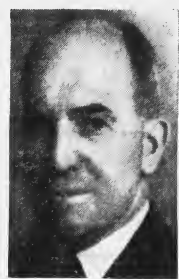

NEW YORK.—In a penthouse atop a midtown hotel, some 20 men are laying plans for organization of a military force which ultimately may develop into the most powerful the world has ever seen.

These experts compose the military staff committee of the United Nations. As the military organ of the security council, the committee is a general staff for the world's international police force whose task will be to prevent and, if need be, suppress aggression.

Charter provisions give the security council power to use armed force to give effect to its decisions in cases where it considers that such measures as severance of diplomatic relations and communications have failed.

Chiefs-of-staff of the big five—United States, United Kingdom, Russia, France and China—are permanent members of this committee.

Speculation naturally centres how much of the 51 member powers each will contribute in manpower and equipment. Most guesses so far have leaned to the theory the United States will contribute heavily in air and sea units, with perhaps the largest share of the ground forces being drawn from Russia.

NEW PRESIDENT—F. I. Ker, publisher of the Hamilton Spectator, was elected president of The Canadian Press. He succeeds Senator W. A. Buchanan, president and managing director of the Lethbridge Herald.

LOAN FOR FRANCE

Canada Is To Provide Credit For
Making Purchases Here

OTTAWA.—Markets for the products of western farms have been created in France through an agreement with the government of France signed by Finance Minister J. L. Halley acting on behalf of the Canadian government.

Under the agreement, announced in the house by Mr. Halley, Canada will provide to France a credit of \$242,500,000 to enable France to make purchases in this country.

It makes greater outlets for the agricultural products of the west as well as the industrial output of the east. It is a practical reply to the appeal voiced by Leon Blum, French ambassador of goodwill to the Canadian people, to assist France in her post-war rehabilitation struggle.

The credit is not a gift to the French people. It bears interest at three per cent. and is repayable in 30 annual installments commencing the end of 1947 and running until the end of 1976. It is the largest of all Canadian credits under the Export Credits Insurance Act.

MAKES PAYMENT

Two Contributions From Canada To
UNRRA Total \$154,000,000

OTTAWA.—Canada has paid her two contributions to the United Nations Relief and Rehabilitation Administration totalling \$154,000,000, it was learned. Under the provisions of the contributions 90 per cent. has to be spent in this country for goods to be shipped to needy nations and the remainder goes into a free fund to be spent as UNRRA decides. The free fund contributed by all nations in UNRRA also will make extensive purchases in Canada where goods are available.

FEW APPLICATIONS

OTTAWA.—A three-day conference of supervisors of training from veterans department rehabilitation centres across Canada was told only one in every 20 veterans has applied for out-of-work benefits. That figure was given by W. S. Woods, deputy minister.

LARGE SUM WOULD BE NEEDED FOR OLD AGE PENSION PLAN AS OUTLINED TO GOVERNMENT

OTTAWA.—Two hundred million dollars in 1948 will be the cost to the Dominion government if its pension plan was outlined to the Dominion-provincial conference is put into effect, according to figures given the house by the national health minister, Brooke Claxton.

The cost in that year would be almost one-third of the government's estimated total income tax revenue for the year 1945-46.

The health minister gave the members an elementary lesson on economics as it applies to govern-

ment income versus government expenditures earmarked for social services, after listening all afternoon to a debate on a resolution introduced by Angus MacInnis, (C.C.F., Vancouver East). The resolution advocated the lowering of the pension age, increasing the pension and abolition of the means test.

Mr. MacInnis suggested he would like to see \$50 a month pensions paid at 60 years of age. The suggestion brought the blunt reply from Mr. Claxton, "we can have old age pensions of this size but we can meet that type of expenditure only out of taxes or out of borrowings or out of printed money. There are only those three ways."

Reviewing pension plans in effect in other countries, Mr. Claxton concluded that the Canadian proposal put before the provinces at the Dominion-provincial conference was a "fair and workable plan in line with what is in effect in other countries." He added, "they are proposals which we believe can be carried out by the Canadian people and which will work to their advantage and the burden can be carried by the Canadian economy."

The federal plan would provide for the payment of \$30 per month without a means test to everyone at the age of 70 years. In addition the Dominion government also proposed to contribute on a 50-50 basis to the payment of old age pensions with a means test to everyone from 65 to 69 at a cost, Mr. Claxton estimated would be no less than \$34,000,000 and probably \$40,000,000.

Mr. and Mrs. Wes. Vincent plan on leaving for Calgary on Thursday morning and await the arrival of their daughter, Cpl. Thelma Vincent RCAF (WD) who is scheduled to arrive in Calgary Sunday morning on the last lap of her return from overseas. They will be accompanied to the city by Mrs. W. Gate.

Francis Marconi returned home from Vancouver last week, where he has secured employment and housing accommodation. He expects to return to the west coast city some time this week. His English bride is expected to arrive in Canada in the near future. While at the west coast he took time out to visit Angelo Gentile at Fort Langley.

Miss Katie Gorseck has left for her home at Dapp, Alberta, after spending the past few months the guest of Mr. and Mrs. J. H. Kapalka. Tom Gorseck who has spent the past six months in Coleman also left for Dapp during the week.

ANNOUNCEMENT

Mr. and Mrs. Russell Vincent announce the engagement of their only daughter, Margaret Henrietta, to Mr. Richard Stanley Green, eldest son of Mr. and Mrs. Richard Green, of Calgary, the wedding to take place at St. Paul's United church, Coleman, on Friday, May the 3rd.

WEDDINGS

COX—DAVIS

St. Paul's United church was the scene of a pretty wedding on Wednesday, April 10, at 6 p.m. when Hazel Margaret, daughter of Mr. Frederick Davis, was united in marriage to Mr. Wilmer M. Cox. The ceremony was conducted by Rev. J. McKelvey, of Blaimore. The church was beautifully decorated for the occasion with spring flowers and ferns. The wedding march was played by Mr. Joe Emmerson. The bride, given in marriage by her father, wore a brown ensemble with matching accessories and a corsage of yellow roses.

The bridesmaid, Miss Anna Melusik, was born in a lime green ensemble with black accessories and wore a corsage of pink roses.

Mr. Alex. Cox, brother of the groom was bestman.

The reception was held in the banquet room of the Grand Union with roses flanked by tapers. Covers were laid for 45 guests.

The happy couple left for a honeymoon at Calgary and Banff and following their return will take up residence in Coeman.
